# Architectural Doors

Choosing from our Architectural range ensures that the garage door becomes an integral part of your home's overall design. Available in a variety of exciting styles, materials and finishes, these doors don't just make a statement; they are the statement!

Make your statement with flat minimalism, negative detailing, flush mounting and exciting up to date architectural colours.

# Cedar Doors

Ashtons Cedar Doors create a classic look and add character to any home. Providing natural variations in colour and grain, the Western Red Cedar timber used makes every door unique. And just to add that extra touch of individuality, we can vary the width and thickness of the door and offer solid raised cedar and mock cedar louvre profiles.

# Plywood and Batten Doors

Ply and Batten Doors from Ashtons let you develop a look that suits your property and your property alone. Any number of cedar batten profiles can be used to create a truly unique garage door. You can choose from a number of external grade types of plywood to match materials already existing on your home and use the battens to create stunning visual contrasts.

# Flat Panel Doors

The flat minimalist style of these doors perfectly complement modern home architecture. Very strong and highly durable, these robust doors are manufactured from 0.95mm steel to deliver an uncluttered, natural look that can also be colour powder-coated to meet your demands. Another advantage of zinc-based steel doors is that they can easily be insulated, our insulation has the highest 'R' rating available on the market which means our insulated doors provide superior insulation and noise reduction.

# Alpine Insulated Doors

Ashton Alpine Insulated Doors are more than just simple garage doors. Consisting of polystyrene foam sandwiched between two finished steel skins, they are perfect for adding insulation to your home and reducing external noise.

Another innovation with these doors is their 'pinch-free' construction. No longer do you have to worry about your fingers being caught if you pull the door up or down by hand; this unique safety feature protects both you and your children from accidental harm.

The visual impact of a well-designed garage door will enhance the street appeal of your home. A well-built door will reduce maintenance.

## This is why you should talk to Ashtons Garage Doors.

- Our garage doors are architecturally designed to complement modern house plans
- The materials we use are of the highest grade so that you get maximum durability and enduring visual appeal
- We use only the best components to ensure continued safety and ease of operation

All Ashtons Garage Doors are made to order to custom fit your home. Once you have chosen from our extensive range of designs, each door is hand-built in the materials and finish of your choice. For materials, you can choose from cedar, ply, aluminium or zinc-based steel. We incorporate a 25mm x 25mm galvanised box section for uncompromising strength, heavy-duty galvanised springs for longevity (up to 20,000 cycles) and ball-bearing supported wheels for silky smooth operation.

Other features include a durable weather seal to keep out leaves and dirt, reinforcing for wide doors (for added safety and security) plus the option for manual or remote operation.

We recommend that all sectional doors be installed with proven reliable automatic garage door openers. We have an extensive range available and can advise you on the best option.

**Ashtons Garage Doors is a company on the move. Check our website for product updates and information plus the latest trends in garage door technology.**

# Other Ashtons Products

## Repairs and Maintenance

The installer teams at Ashtons have over 125 years combined experience in the installation and repair of garage doors! Keep your garage doors in top condition with regular servicing by our trained professionals.

# Caring for your Ashtons Garage Door

**Ashtons has over 35 years experience in the making of quality garage doors. We are proud of the legacy we have created and are excited about future opportunities.**

All Ashtons Garage Doors are made from the best materials available. They are manufactured to deliver maximum good looks and carefree operation. With regular care and maintenance they will deliver years of trouble-free service.

All Ashtons Garage Doors in normal residential use are covered by a 1-year warranty for all components and labour.

All timber doors are affected by weathering and should be cared for the same as outdoor furnishings and decking. i.e. they should be cleaned at least once every 12 months and restained using proprietary timber stains. Doors should also be regularly inspected for cracks or other damage caused by harsh operation or impacts by heavy objects.

Zinc-base steel, Aluminium Composite and Nu-Wall® Aluminium door claddings will require very little maintenance. They should however be cleaned at least once a year using a domestic exterior cleaning solution and clean water. No attempt should be made to overpaint these doors as no guarantee can be made as to the longevity of the paint used.

All moving parts should be regularly checked for excessive wear and tear and lubricated with a silicone-based lubricant. All screws and bolts should be regularly checked for tightness. A monthly test of any automatic garage door opener's safety settings should be carried out in accordance with the manufacturer's recommendations.

Ashtons Garage Doors also recommends a yearly service by a trained professional to ensure the correct spring tensions, safety settings and continued trouble-free operation.
